

PRODUCTOS NASIKA, S.A.U. is a company, founded in 1968, dedicated to:

1. Design and production of predispersed rubber chemicals
2. Design and manufacture of rubber compounds.
3. Commercialization of chemical products for the adhesives, rubber, plastics, and paints industries.

With the aim of continuous improvement, conducting our business while respecting sustainable development and environmental protection, Nasika has implemented and established a Quality Management System based on ISO 9001:2015 (for points 1 and 3 mentioned) and an Environmental Management System based on ISO 14001:2015. To achieve all this, Nasika's Management has established the following Policy and principles:

Calidad:

- To supply products that meet the needs and expectations of our customers and other stakeholders, as well as legal and regulatory requirements, based on the best possible quality, price, and service ratio.
- To coordinate the necessary actions within the company to resolve any customer problems.
- Management provides the necessary resources to continuously improve the effectiveness of the quality management system
- To continuously improve the quality of our production process, our products, and our service, with the goal of "ZERO DEFECTS," so that our customers can be confident that we offer them the quality and service they require at all times
- To position ourselves competitively, ensuring future profitability and the expansion of our company, placing us among the best European manufacturers and distributors in our specialties.
- To promote training, participation and teamwork among company personnel

Medioambiente:

- Ensure compliance with all applicable environmental protection laws, regulations, and internal requirements.
- Assume responsibility for controlling our activities, processes, products, and services that impact the environment.
- Promote the use and development of technologies that enable the sustainable use of natural resources, reducing their consumption and taking pollution prevention into account.
- Promote the efficient use of natural resources, particularly the sustainable use and management of water and energy in all processes and facilities.
- Ensure environmental protection by minimizing the environmental impacts of our activities at our location (such as gas emissions, waste generation, noise, dust, etc.).
- Raise awareness among all our employees, promoting their environmental training and encouraging active participation, including their suggestions for improvement.
- Integrate the Environmental Management System into Nasika's overall management..

Always taking into account these principles, the Context of the Organization and the needs of the Interested Parties, achievable objectives are established annually, measurable through indicators that are reviewed periodically and aimed at achieving continuous improvement and reducing our footprint on the environment.

This Policy is led by the organization's COO, supported by the person who has allocated the necessary resources to achieve these objectives, and has the support and collaboration of all company personnel, who embrace these principles and put them into practice to ensure the correct implementation of this policy.
